

# 362016

# SAFETY DATA SHEET

According to 29 CFR 1910.1200 Hazard Communication Standard 2012 (HazCom 2012)

| SECTION 1: Identification           |  |  |
|-------------------------------------|--|--|
| Product identifier                  |  |  |
| Product name                        | Cyanuric Acid Reagent  |  |
| Product number                      | R-0013   |  |
| Recommended use and<br>restrictions | To be used in accordance with manufacturer instructions or under the direct guidance of the manufacturer.  |  |
| Manufacturer                        | Taylor Technologies, Inc.<br>31 Loveton Circle<br>Sparks, MD 21152<br>Phone: (410) 472-4340<br>Emergency phone: (800) 837-8548   |  |
| SECTION 2: Hazard(s) identified     | cation   |  |
| Physical hazards                    | Not applicable   |  |
| Health hazards                      | Not applicable   |  |
| Environmental hazards               | Not currently regulated by OSHA. For additional information, refer to section 12 of the SDS.   |  |
| Label elements<br>Hazard pictograms | Not applicable   |  |
| Signal word                         | Not applicable   |  |
| Hazard statements                   | Not applicable   |  |
| Precautionary statements            |  |  |
| Prevention                          | Avoid contact with skin, eyes, or clothing. For contact with skin or eyes, flush 20 minutes with water. If ingested, contact physician or local poison control center. Treat symptoms as needed. |  |
| Response                            | This reagent is not defined as a hazardous chemical per OSHA's Hazard Communication Standard 2012; however, use care when handling.  |  |
| Storage                             | Keep tightly capped. Store out of direct sunlight between 36°F–85°F.   |  |
| Disposal                            | Dispose of contents/container in accordance with local/regional/national/international regulations.  |  |
| Hazards not otherwise classified    | Not applicable   |  |

## SECTION 3: Composition/information on ingredients

| Mixture   |                          |                |        |
|---|--------------------------|----------------|--------|
| Chemical name   | Common name and synonyms | CAS number     | % w/w  |
| Water   | Dihydrogen oxide         | 7732-18-5      | 80-100 |
| Nonhazardous and other components below reportable levels | Not applicable           | Not applicable | 1-5    |

## SECTION 4: First-aid measures

### If inhaled

Remove individual to fresh air. Seek medical advice/attention if breathing becomes difficult or if respiratory irritation develops. Give oxygen or artificial respiration if needed.

## In case of skin contact

Immediately flush skin with plenty of water for at least 20 minutes. If clothing comes in contact with the product, the clothing should be removed and laundered before reuse. Seek medical advice/attention if irritation develops.

## In case of eye contact

Immediately flush eyes with plenty of water for at least 20 minutes. Remove contact lenses if present and easy to do. Continue rinsing. If symptoms persist or in all cases of concern, seek medical advice/attention.

## If swallowed

Rinse mouth. Never give anything by mouth to a person who is unconscious or is having convulsions. Do NOT induce vomiting unless directed by physician. If vomiting occurs, keep head low so that stomach content does not get into the lungs. If symptoms persist or in all cases of concern, seek medical advice/attention.

## Most important symptoms and effects, both acute and delayed

Refer to section 2 and/or section 11 of the SDS for the most important known symptoms and effects

## Indication of any immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically.

## **General information**

Ensure medical personnel are aware of the material(s) involved and take precautions to protect themselves.

## SECTION 5: Firefighting measures

| Extinguishing media<br>Suitable extinguishing media       | Use extinguishing media appropriate for surrounding fire.                                     |
|---|---|
| Unsuitable extinguishing media                            | Do not use a heavy water stream. Use of heavy stream of water may spread fire.                |
| Specific hazards arising<br>from the substance or mixture |   |
| Fire hazard   | Not flammable   |
| Explosion hazard  | Not explosive   |
| Reactivity  | Hazardous reactions will not occur under normal conditions.                                   |
| Hazardous combustion products                             | Carbon oxides, nitrogen oxides, sodium oxides. Other irritating fumes and smoke.              |
| Advice for firefighters<br>Precautionary measures         | Exercise caution when fighting any chemical fire; hazardous fumes will be present.            |
| Firefighting<br>equipment/instructions                    | Use water spray or fog for cooling exposed containers.  |
| Protection during firefighting                            | Do not enter fire area without proper protective equipment, including respiratory protection. |
| Other information   | Refer to section 9 of the SDS for flammability properties.                                    |

## SECTION 6: Accidental release measures

### Personal precautions, protective equipment, and emergency procedures

Wear appropriate protective equipment and clothing during cleanup. Local authorities should be advised if significant spillages cannot be contained. For personal protective equipment, refer to section 8 of the SDS.

## **Environmental precautions**

Avoid discharge into drains, watercourses, or onto the ground.

## Methods and material for containment and cleaning up

Dike the spilled material where this is possible. Stop leak if it can be done without risk. Absorb spillage to prevent material damage. Absorb in vermiculite, dry sand or earth, and place into containers. Prevent entry into waterways, sewers, basements, or confined areas. Following product recovery, flush area with water. Never return spills to original containers for reuse. Contaminated absorbent material may pose the same hazards as the spilled product. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations.

## **Reference to other sections**

For exposure controls and personal protection, refer to section 8 of the SDS. For waste disposal, refer to section 13 of the SDS.

## SECTION 7: Handling and storage

#### Personal precautions, protective equipment, and emergency procedures

Do not breathe mist or vapor. Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. For personal protective equipment, refer to section 8 of the SDS. Keep away from incompatibles. Observe good industrial hygiene practices. Label containers appropriately.

#### Conditions for safe storage, including any incompatibilities

Keep tightly capped. Store out of direct sunlight between 36°F–85°F. Store away from incompatible materials (refer to section 10 of the SDS).

## SECTION 8: Exposure controls/personal protection

#### **Occupational exposure limits**

Not regulated

## US NIOSH: Pocket Guide to Chemical Hazards

Not regulated

## US OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Not regulated

## **Biological limit values**

No biological exposure limits noted for the ingredient(s)

## Exposure controls

| Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eyewash facilities and emergency shower must be available when handling this product. |
|---|
|   |
| Wear appropriate chemical safety goggles if contact is likely to occur.   |
| Wear appropriate chemical-resistant gloves and clothing if contact is likely to occur.  |
| Wear appropriate protective clothing if contact is likely to occur.   |
| In case of insufficient ventilation, wear suitable respiratory equipment. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fumes at levels exceeding the exposure limits. Advice should be sought from respiratory protection suppliers.   |
|   |

## SECTION 9: Physical and chemical properties

## Information on basic physical and chemical properties

| Physical state                        | Liquid                               |
|---------------------------------------|--------------------------------------|
| Form                                  | Liquid                               |
| Color                                 | Clear, colorless or nearly colorless |
| Odor                                  | Odorless                             |
| Odor threshold                        | No data available                    |
| рН                                    | 5.8                                  |
| Evaporation rate                      | No data available                    |
| Melting point                         | No data available                    |
| Freezing point                        | No data available                    |
| Initial boiling point (boiling range) | No data available                    |
| Flash point                           | No data available                    |
| Specific gravity                      | No data available                    |
| Auto-ignition temperature             | No data available                    |
| Decomposition temperature             | No data available                    |
| Flammability (solid, gas)             | No data available                    |
| Upper Flammability Limit              | No data available                    |
| Lower Flammability Limit              | No data available                    |
| Vapor pressure                        | No data available                    |
| Vapor density                         | No data available                    |
| Solubility                            | Soluble in all proportions           |
| Partition coefficient                 | No data available                    |
| (n-octanol/water)                     |                                      |
| Viscosity                             | No data available                    |
| Explosive properties                  | No data available                    |
| Oxidizing properties                  | No data available                    |

## SECTION 10: Stability and reactivity

| Reactivity                            | Hazardous reactions will not occur under normal conditions.   |  |
|---------------------------------------|---|--|
| Chemical stability                    | Stable under recommended handling and storage conditions (refer to section 7 of the SDS)  |  |
| Possibility of hazardous<br>reactions | No dangerous reaction known under conditions of normal use  |  |
| Conditions to avoid                   | Contact with incompatible materials. Do not use in areas without adequate ventilation.  |  |
| Incompatible materials                | Acetaldehyde, acids, chlorine, ethylene oxide, isocyanates, metals, organic materials, peroxides, phenols, reducing agents, strong bases, strong oxidizing agents |  |
| Hazardous decomposition<br>products   | Hazardous reactions will not occur under normal conditions  |  |
