CLASS DESCRIPTION

The U.S. heating, ventilation, air-conditioning, and refrigeration (HVAC) industry is currently undergoing a period of unprecedented change! Anyone who works on air conditioners and refrigerators must be aware of how these changes affect their job, apartment community and management company.

We'll discuss recent industry and regulatory changes as well as troubleshooting, diagnostics & repair and offer solutions to some of the new challenges. Learn how to charge using Superheat and Sub-cooling and how to convert to Dew Point and Bubble Point that is required for some of the new Refrigerants.

This class allows the attendee to be able to make the right decision on how to embrace these changes with minimal financial impact to the budget.
